# Migara Denuwan | Software Engineering Undergraduate

Palanwaththa, Pannipitiya, Sri Lanka | +94 76 422 8336
migaradenuwan@outlook.com |LinkedIn| Github

A hardworking individual currently in the 4th year of BSc. (Hons) in Information Technology specializing in Software Engineering at SLITT. Passionate about developing new skills, exploring innovative technologies, and continuously improving expertise in software development and related fields. Eager to gain practical experience and contribute to challenging projects.

## EDUCATION

**B. Sc (Hons) Information Technology Specializing in Software Engineering** **2022 – 2026**
*Sri Lanka Institute of Information Technology* | Malabe

**GCE A/L (Physical Science – 1B 2C's) | GCE O/L (6A's 2B's 1C)** **2012– 2022**
*Mahanama College* | Colombo 3

## EXPERIENCE

**Tokyo Cement Group - Software Engineer Intern** **May 2025 – Present (6 mos) - On-site**

- Worked on Farm Management System using React, Node.js, and MongoDB.
- Developed and tested ERP systems using the FOP language.
- Involved in feature enhancement, bug fixing, and system optimization.

**Synex International (Pvt) Ltd - Software Engineer Intern** **Dec 2024 – May 2025 (6 mos) – On-site**

- Worked on web application development using React, Node.js, and MongoDB.
- Participated in testing, debugging, and performance improvement activities.

## PROJECTS

**Happy Man Village (A Villa Management System)**

- A simple website made as a group project using HTML, CSS, and JavaScript.
- Backend implemented using SpringBoot.
- Hosted the website using Microsoft Azure.
- The database used was Microsoft SQL workbench.

**Egg Hunting (An Android Mobile Game)**

- An android game made using Kotlin.
- Implemented in android studio.

**TaskEase ( An Android Task Management App)**

- An Android Task Management App made using Kotlin.
- Implemented in android studio.

**MomCare (A Healthcare App for Pregnant Mothers and Newborn Babies)**

- Developed a mobile app using React Native and Expo.
- Integrated Google Maps API for doctor locations.
- Implemented doctor locator, reviews, and health tracking.
- Deployed on Microsoft Azure.
- Focused on accessibility and usability for mothers and newborns.

**ProMentor(A Code Learning, Reviewing, and Quiz Management Web Application)**

- Developed using React, CSS, and MongoDB.
- Integrated Gemini API for intelligent code evaluation.
- Implemented Clack for interactive learning and quiz management.
- Designed modules for learning, reviewing, and testing coding skills.
- Enabled collaborative development and code practice for multiple users.

**Snap Eats (Microservices-Based Food Delivery Platform)**

- A collaborative group project developed using Spring Boot, React, and TypeScript.
- Designed with a microservices architecture for modular development.
- Implemented User Management Service with role-based login.
- Developed Notification Service for real-time updates.
- Containerized all services using Docker for scalable deployment.
- Integrated services via REST APIs for inter-service communication.

**Street vs Building Image Classification (Deep Learning using LSTM)**

- Group project comparing CNN and RNN models for image classification.
- Implemented data preprocessing, training, and evaluation using Python, TensorFlow, and Keras.
- Analyzed results to assess the effectiveness of both architectures for visual recognition.

## TECHNICAL SKILLS

**Programming Languages:**

- Java
- Python
- C / C++
- JavaScript
- TypeScript
- Kotlin
- PHP
- SQL

**Frontend Development:**

- HTML
- CSS
- Tailwind CSS
- React
- React Native

**Backend Development:**

- Node.js
- Spring Boot

**Databases:**

- MongoDB
- MySQL
- PostgreSQL
- Microsoft SQL Server

**Tools & Technologies:**

- Docker
- Kubernetes
- Postman
- IntelliJ IDEA
- Visual Studio
- Android Studio
- MySQL Workbench
- Jira
- GitHub

## EXTRA CURRICULAR

- Committee Member of Science Society
- Member of Buddhist Society
- Member of Media Unit
